Department of Computer Science and Engineering

Daffodil AI CLUB

AR/VR & GAME DEVELOPMENT LAB

RESEARCH POSTER COMPETITION 2026

1/4 PAGE

PHASE 1 RESULTS • SELECTED FOR THE FINAL ROUND

TEAM NAME	RESEARCH TITLE
AirXAI	Weather-Normalized Assessment of $PM_{2.5}$ Pollution Trends in Dhaka, Bangladesh: A Counterfactual Approach to Quantifying Anthropogenic Emission Changes
Andromeda	Uncertainty-Triggered Edge–Cloud Collaborative Inference for Smartphone-Based Fish Disease Diagnosis in Low-Connectivity Aquaculture
Aquatic-Life	A Lightweight Digital Twin and Retrieval-Augmented Assistant for Salinity-Based Aquatic-Life Suitability in Coastal Bangladesh Rivers
Beyond Boundaries	FreshTrack: An IoT-Enabled Machine Learning Framework for Real-Time Monitoring and Prediction of Post-Harvest Vegetable Spoilage in Smallholder Farming Systems
Compile Error	Privacy-Preserving Non-Invasive Anemia Screening from Conjunctival Images Using Federated Learning Across Multi-Site Datasets
D Vision	TD-GateNet: Adaptive Texture-Disparity Gating for Interpretable Brain Tumor MRI Segmentation
DeepThinkers	The Bangla Token Tax: An Empirical Study of Token Efficiency and Computational Cost in English, Bangla, and Banglish Large Language Models
Digital Pioneers	A Computational Framework for DNA-Linked Authentication and Cryptographic Provenance of Environmental Samples
Diu_error_311	An Intelligent Learning Framework for Energy-Efficient Resource Allocation and Cooling Optimization in Sustainable Data Centers
DOMINIX	An Explanation-Faithfulness Audit for Medical Imaging: Evaluating Demographic Disparities in Explanation Faithfulness

Final Poster Presentation • 15 November 2026 • Daffodil International University

Organized by Dept. of CSE • Lead Organizer: Artificial Intelligence Centre • Supported by Daffodil AI Club & AR/VR Game Development Lab

RESEARCH POSTER COMPETITION 2026

2/4 PAGE

PHASE 1 RESULTS • SELECTED FOR THE FINAL ROUND

TEAM NAME	RESEARCH TITLE
ExplorersTrio	When and How Much Does ImageNet Pretraining Help? A Multi-Seed Study on Steel Surface Defect Classification
FabricDefectEye	FabricDefectEye: An Integrated YOLOv8–ConvNeXt Framework for Real-Time Fabric Defect Detection and Intelligent Quality Assessment
Finders	HoneyChain: A Blockchain-Anchored Framework for Completeness and Chronological Integrity Verification of Honeypot Attack Evidence
GarmentsBizz BD	AI-Driven Smart Textile Testing and Autonomous Verification Framework
Hallucinators	Register-Induced Hallucination: Quantifying Factual Degradation Across Formal, Colloquial, and Romanized Bengali Queries
Helix Research	Unveiling Neurological Disorder Biomarkers and Molecular Pathways Through an Integrated Bioinformatics and Deep Learning Framework
Intsysxlab	Adaptive Receding-Horizon LKH-SC for Robust UAV–UGV Cooperative Data Collection in Dynamic Wireless Sensor Networks
KidneyCare	A Low-Cost IoT-Based Colorimetric Device for Urine ACR Screening and Kidney Health Tracking
Marshmallow	Cross-Lingual Financial Scam Detection: An Explainable Machine Learning Framework for Bangla, English, Banglish, and Code Mixed Text
MelaXAI	Multimodal Melanoma Classification Using Dermoscopic Images and Clinical Metadata

RESEARCH POSTER COMPETITION 2026

3/4 PAGE

PHASE 1 RESULTS • SELECTED FOR THE FINAL ROUND

TEAM NAME	RESEARCH TITLE
MindMesh	An Integrated Approach For Detecting Illegal Logging in Bangladesh Using Acoustic Sensors and Satellite Data
NeuroNexus	Leakage-Free Explainable Deep Learning for Depres-sion Risk Classification from Social Media and Be-havioral Features
NeuroVision	Uncertainty-Aware Brain Tumor MRI Classification: Benchmarking Pretrained Transformer-CNN Hybrids with Monte Carlo Dropout and Calibration Analysis
RiverLens	Dhaka River Health Atlas: mapping pollution hotspots and heat stress on the city's rivers with satellite data and explainable AI
Shadow Researchers	AgriTriage-Lite: Foundation-Model Distillation and Conformal Triage for Offline Plant Disease Diagnosis with Local Recalibration
SigmaX	Barriers to Healthcare Accessibility Among Autistic Individuals Across Different Age Groups in Bangladesh: A Cross-Sectional Mixed-Methods Study
Stellar Moon	Towards Reliable Autonomous Spacecraft Landing: A Reinforcement Learning Approach to Reward Engineering
STK	Bangla on the Edge: How Quantization Affects Speed, Memory, and Language Quality in Small On-Device LLMs
StratifyX Global	Factuality-Aware Bangla News Headline Generation: A Comparative Study of Fine-tuned Transformers and LLMs with Hallucination Detection
Team Code ArenaX	A Unified IoT - Machine Learning Framework for Ecosystem-Specific Carbon Stock Estimation and Uncertainty-Aware Digital MRV in Bangladesh

Final Poster Presentation • 15 November 2026 • Daffodil International University

Organized by Dept. of CSE • Lead Organizer: Artificial Intelligence Centre • Supported by Daffodil AI Club & AR/VR Game Development Lab

RESEARCH POSTER COMPETITION 2026

4/4 PAGE

PHASE 1 RESULTS • SELECTED FOR THE FINAL ROUND

TEAM NAME	RESEARCH TITLE
Team DeepVision	Difficulty-Aware Cost-Constrained Routing of Vision-Language Models for Efficient Visual Question Answering
Team NeuroWeave	AI-Powered Textile Waste Intelligence: A Computer Vision-Based Framework for Intelligent Textile Waste Classification and Sustainable Recovery
The Visionaries	Lost in Translation? Evaluating the Medical Accuracy and Safety of Large Language Models in Bangla versus English Health Queries
Threat Defender	Differentiating Legitimate Administrative Scanning from Malicious Network Reconnaissance Using Machine Learning
TRIADIX	The Influence of Brain MRI Defacing Algorithms on Brain-Age Predictions via 3D Convolutional Neural Networks
TruthForge	Detecting and Measuring Hallucinations in AI-Generated Bangla Answers Using Evidence-Based Verification
Unknown	A Verified Campus-Only Marketplace Mobile App for University Students
Wild Falcon	A Hybrid Bangla-English NLP Framework for Actionable Flood Emergency Information Extraction and Location-Aware Prioritization
X Dimensions	Classifying Cerebral Palsy using GAIT Recognition
X Scientists	Triaging the ER: Explainable Machine Learning for Maternal Health Risk Stratification

Final Poster Presentation • 15 November 2026 • Daffodil International University

Organized by Dept. of CSE • Lead Organizer: Artificial Intelligence Centre • Supported by Daffodil AI Club & AR/VR Game Development Lab
